Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 19, 2008 has been entered.

EXAMINER'S AMENDMENT

The application has been amended as follows:

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Julianne Sullivan on March 18, 2008.

The claims were amended as follows:

1. (Currently Amended) A multilayer luminal braided self-expanding stent for an anatomical conduit, expandable from a reduced diameter to a nominal diameter, comprising a cylindrical outer braided peripheral stent structure comprising ~~at least one~~ a layer wherein

said outer peripheral stent structure is permanently linked by at least a pair of filaments to a cylindrical central hollow braided core comprising ~~at least one~~ a layer capable of acting as an inner braided hemodynamic flow deflector;

said outer peripheral stent structure, said central hollow braided core and said at least a pair of filaments constitute a commonly braided metal structure, a gap of between 10 to 90% of the nominal diameter of the outer stent structure ~~extending~~ extends between the central braided core and the outer stent structure of the commonly braided structure, wherein said ~~parts~~ outer peripheral stent structure and said central braided core of the commonly braided structure are permanently linked and extend parallel to each other along their respective full lengths.

2. (Currently Amended) A multilayer stent according to claim 1 wherein the outer braided peripheral stent structure comprises two layers which are connected by at least a pair of filaments in order to connect the two layers to the deflector, the latter comprising at least two layers.

In the specification, in paragraph 6 was amended as follows:

[0006] It is now well established that intimal ~~hyperplasia~~ hyperplasia is the main process that induces belated narrowing of the lumen, even one or two years after intervention. It is related to the loss of endothelium and to medial injuries, which lead to an accelerated luminal smooth muscles proliferation migrating from the media or the intima and later to atherosclerosis degeneration.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Upon reviewing the prior art now of record, the Examiner thought that US patent 4,416,029 should be mentioned. The gap between layers in this patent is not disclosed but by measuring the drawings, the gap was determined to be about 1/32nd (or 3%) of the outer graft diameter so it is well below the 10% to 90% of the diameter needed to meet the claim language. It should be noted that the drawings are not to scale so they cannot be relied upon for particular dimensions but nonetheless further suggest that the claimed invention is distinct therefrom.

With regard to patent WO 01/01887, the inner layer (2) thereof is not a braided layer and it does not have the gap range as claimed. Furthermore, the layers are not a commonly braided structure as required by the present claims. For these reasons, the claimed invention is considered clearly distinct and patentable therefrom.

With regard to the change in claim 2, line 4 in the amendment filed February 19, 2008, the Examiner, after consultation with two other examiners, decided that "last two layers" was a typographical error for ---at least two layers." For this reason, the change in the amendment was not considered as introducing new matter into the specification.

With regard to the interpretation of claim 1, the Examiner determined that, on line 10 thereof, the language "the nominal diameter" refers to and incorporates the preamble of the claim into the body of the claim. For this reason, newly cited US 1,104,778 does not read on the claimed structure because, at the minimum, the patent clearly does not have a self expanding stent structure that is capable of being used in an anatomical conduit; see page 1 and Figure 2 thereof.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
